Tartalom

GRIN áttekintés

Datalog áttekintés

Strukturális holt-kód eltávolítás

Mérési eredmények

GRIN áttekintés

Miért funkcionális?

Deklaratív

pro: magasabb absztrakciós szinten való programozás

Kompozicionalitás

pro: kis programokat könnyedén lehet összeilleszteni

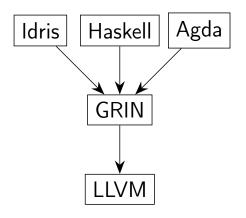

con: sok függvényhívást eredményez

Függvények elsőrendű értékként

pro: magasabb rendű függvények

con: ismeretlen függvényhívások

Graph Reduction Intermediate Notation

Front end kód

Front end kód

```
main = sum (upto 0 10)
                                      main
upto n m
  | n > m = []
  | otherwise = n : upto (n+1) m
                                       eval
sum [] = 0
sum (x:xs) = x + sum xs
                                sum
                                             upto
```

GRIN kód

```
eval p =
                             v <- fetch p
                             case v of
grinMain =
                               (CInt n) -> pure v
  t1 <- store (CInt 1)
                               (CNil)
                                            -> pure v
  t2 <- store (CInt 10)
                               (CCons y ys) -> pure v
  t3 <- store (Fupto t1 t2)
                               (Fupto a b) ->
  t4 <- store (Fsum t3)
                                 zs <- upto a b
  (CInt r) <- eval t4
                                 update p zs
  _prim_int_print r
                                 pure zs
                               (Fsum c) ->
                                 s <- sum c
                                 update p s
                                 pure s
                                  4□ > 4□ > 4□ > 4□ > 4□ > 3□
```

Datalog áttekintés

Logikai programozás

$$c \vee \neg p_1 \vee \neg p_2 \vee \cdots \vee \neg p_n$$

Logikai programozás

$$c \leftarrow p_1 \wedge p_2 \wedge \cdots \wedge p_n$$

Egyszerű points-to elemzés Datalog-ban

$$\frac{\mathtt{Store}(p,n)}{\mathtt{Heap}(p,n)}\;(\mathsf{H}\text{-}\mathsf{Store})\qquad \frac{\mathtt{Update}(*,p,n)}{\mathtt{Heap}(p,n)}\;(\mathsf{H}\text{-}\mathsf{Update}')$$

A GRIN nyelv Datalog modellje (részlet)

$$\frac{p \leftarrow \text{store } n}{\text{Store}(p, n)} \text{ (ER-Store)} \qquad \frac{n \leftarrow \text{fetch } p}{\text{Fetch}(n, p)} \text{ (ER-Fetch)}$$

$$\frac{x \leftarrow \text{update } p \ n}{\text{Update}(x, p, n)} \text{ (ER-Update)}$$

$$\frac{k \leftarrow \text{pure } \text{lit}}{\text{LitAssign}(k, \tau(lit), lit)} \text{ (ER-Lit)}$$

$$\frac{y \leftarrow \text{pure } x}{\text{Move}(y, x)} \text{ (ER-Move)}$$

Valódi points-to elemzés Datalog-ban

$$\frac{\mathtt{Store}(p,n)}{\mathtt{Heap}(p,n)}\;(\mathsf{H}\text{-}\mathsf{Store})\qquad \frac{\mathtt{Update}(*,p,n)}{\mathtt{Heap}(p,n)}\;(\mathsf{H}\text{-}\mathsf{Update}')$$

Valódi points-to elemzés Datalog-ban

$$\frac{\texttt{Update}(*,p,n)}{\texttt{CreatedBy}(p,p')} \\ \frac{\texttt{Store}(p,n)}{\texttt{Heap}(p,n)} \; (\texttt{H-Store}) \qquad \frac{\frac{\texttt{Heap}(p',*)}{\texttt{Heap}(p',n)} \; (\texttt{H-Update})}{\texttt{Heap}(p',n)}$$

Created-by elemzés (részlet)

$$\frac{\texttt{Node}(\textit{n},*)}{\texttt{CreatedBy}(\textit{n},\textit{n})}\;(\texttt{C-Node}) \qquad \frac{\texttt{Store}(\textit{p},*)}{\texttt{CreatedBy}(\textit{p},\textit{p})}\;(\texttt{C-Store})$$

Created-by elemzés (részlet)

$$\frac{\text{Node}(n,*)}{\text{CreatedBy}(n,n)} \text{ (C-Node)} \qquad \frac{\text{Store}(p,*)}{\text{CreatedBy}(p,p)} \text{ (C-Store)}$$

$$\frac{\text{Fetch}(v,p)}{\text{CreatedBy}(p,p')}$$

$$\frac{\text{Move}(v,n)}{\text{CreatedBy}(n,n')}$$

$$\frac{\text{CreatedBy}(n,n')}{\text{CreatedBy}(v,n')} \text{ (C-Move)} \qquad \frac{\text{CreatedBy}(n,n')}{\text{CreatedBy}(v,n')} \text{ (C-Fetch)}$$

Strukturális holt-kód eltávolítás

Összefoglaló

- Újítasok:
 - új szintaxis
 - Datalog modell, Datalog elemzések
 - strukturális holt-kód eltávolítás
- Eredmények:
 - a strukturális holt-kód eltávolítas képes jelentősen csökkenteni a bináris méretét
 - a rendszer jól működik függőtípusos nyelvekre is
 - az optimalizált GRIN kód jelentősen hatékonyabb
 - a GRIN optimalizációk ortogonálisak az LLVM optimalizációkra

KÖSZÖNÖM A FIGYELMET!
